

SUMMARY

"Product Designer with 5+ years of experience leading end-to-end UX for complex fintech and healthtech platforms — from discovery and information architecture through high-fidelity prototyping to developer handoff. Leads a 3-person design team, having built and scaled a design system adopted across multiple squads, run usability testing and analytics-driven iterations (GA4, Hotjar), and partnered directly with backend/security teams to balance compliance requirements with usability."

EXPERIENCE

Product Designer @ SabaPardazesh PJS Co. ↗

Sep 2023 - Present · 2 yrs 11 mos

Led the end-to-end design of a large-scale Internet Banking platform for retail and corporate customers, collaborating with cross-functional teams to deliver secure, scalable, and user-centered banking experiences. Contributed from product discovery through release while balancing business objectives, technical constraints, and banking regulations.

SIB – Tejarat internet banking

- Led end-to-end design (Discovery → Research → Wireframe → UI → Prototype → Design QA → Release) for the redesign of Tejarat Bank's Internet Banking platform, replacing a legacy system used by ~3M retail and corporate customers.
- Designed core banking modules — Dashboard, Authentication, Money Transfer, Bills, Check Management, Profile, and Notifications — spanning roughly 60 user flows and 500 Figma screens.
- Built a Material 3-based design system from the ground up (~40 new components, 20 customized), standardizing UI patterns and speeding up front-end handoff.
- Ran competitor analysis and usability testing to navigate constraints around banking regulations, security requirements, legacy technical debt, and ambiguous requirements.
- Took on team leadership as the design team grew to 3 designers — dividing work, running design reviews, mentoring, and owning key design decisions — while continuing to present design outcomes directly to bank stakeholders throughout the project.
- Collaborated daily within an agile team of 3 front-end and 6 back-end engineers, a Product Manager, Product Owner, Business Analyst, QA, and Scrum Master.
- Earned formal client satisfaction from the bank on both the new interaction model and overall design quality.

SORM – Internal branch-operations platform, Tejarat Bank

- Directed design execution under a compressed timeline with limited data — prioritizing which flows to redesign first and coordinating hand-off with front-end engineering to hit the release date.
- Redesigning ORM, an internal platform used by ~1,000 branch employees across ~1,700 Tejarat Bank branches, covering Dashboard, Authentication, Account Registration, Internet Banking Activation, and Password Management flows.
- Restructured the information architecture and menu system to simplify day-to-day workflows for branch staff.
- Adapted and localized the Simple Design System into RTL, Persian, (delete) customizing and standardizing components to fit branch-operations needs.
- Gathered direct feedback from bank branches to guide design decisions under a compressed timeline and limited available data.
- Reduced flow complexity, unified UI patterns, and shipped new features — accelerating front-end development and improving cross-team collaboration.
- Collaborated daily with 2 front-end and 4 back-end engineers, a Product Manager, Product Owner, and bank subject-matter experts.

UI/UX Designer @ Freelance ↗

Feb 2022 to Jun 2023 · 1 year 4 mos

DocSplain EMR — AI-Based Electronic Medical Record ↗

- Streamlined clinician data-entry and note-taking with templates, shortcuts, and clearer navigation
- **Designed dashboards and appointment workflows; prototyped, tested, and handed off developer-ready assets**

Earthly Herbs — E-commerce ↗

- Reworked information architecture, PDP and checkout flows based on user research and funnel analysis
- Produced interactive prototypes and detailed specs for engineering; established design tokens and basic UI kit

UI/UX Designer @ Doctop ↗

Jul 2021 to Jan 2022 · 7 mos

- **Designed dashboards and appointment workflows for a healthtech platform, aligning design decisions with user needs and business goals.**
- Ran stakeholder and user interviews, mapping journeys and pain points to inform design direction.
- Simplified interface layouts to reduce cognitive load, improving task completion.
- Delivered wireframes, interactive prototypes, and developer-ready specs in Figma, collaborating closely with product and engineering.

UI/UX Designer @ The Dexign Studio · Internship ↗

Jan 2021 - Apr 2021 · 4 mos

- Delivered UI for web platforms with a focus on usability, accessibility, and visual consistency.
- Partnered with PMs and developers to translate requirements into user flows, wireframes, and high-fidelity prototypes.

Certificates

Enterprise Design Thinking Practitioner

Google UX Design

SKILLS

Methods: user & stakeholder interviews, JTBD, journey mapping, **information architecture**, **usability testing**, heuristic evaluation, **accessibility (WCAG)**, A/B testing, analytics instrumentation, design systems, prototyping, design handoff, Design ops, design system governance.

Tools: Figma, Clarity, **GA4**, Hotjar, Jira/Confluence, Useberry/Maze.

Interpersonal: stakeholder management, workshop facilitation, documentation, cross-functional collaboration.

Domains: Fintech, Healthtech

Languages: English (Fluent).

EDUCATION

Pars University of Architecture and Art

Master of Industrial Design

2018 - 2023

University of Science and Culture

Bachelor of Computer Software Engineering

2018 - 2023
